Unveiling Progress Through Unwavering Dreams

“A little progress every day adds up to big results, and so we strive more for progress, than perfection.”

At the inception of another promising month, we stand humble and proud, witnessing the boundless progress and indomitable spirit of our students. They say that a school is a cradle of dreams, and within these walls, our students are not merely dreamers, but they are the architects of their own success stories, etching their aspirations onto the canvas of reality. The tapestry of achievements woven by our young scholars reflects their dedication and zest for excellence. In a world abuzz with activity, our students have not only taken part but have triumphed in a plethora of activities that span far beyond the confines of classrooms. Their victories gleam not only within the school premises but have reached far and wide, be it in inter-school or intra-school competitions.

With hearts full of determination, we conducted the Spell Bee School Round, witnessing the participation of 450 students. The echoing buzz of words showcased their linguistic finesse and hunger for knowledge, a testament to their continuous strife for improvement. Venturing beyond our city limits, our students embarked on a literary pilgrimage to Daly College, Indore, for the G-Literati program, an event by AFS. Here, they met the luminaries of India's literary world, sipping wisdom from the minds that weave words into magic. It was an encounter that ignited sparks of inspiration, fuelling their love for literature and learning. Amidst the digital age's symphony, the 9th version of the Annual Inter School Technology Symposium of DPS Bhopal, known as (C)ync V9.0, was orchestrated under the watchful eyes of the Department of Computer Science.

Independence Day wasn't just a date on the calendar; it was a tapestry of patriotism that our students wove with every brushstroke of their emotions. Activities that resonated with the heartbeats of the nation brought forth their love for the country, fostering a sense of selfless service and gratitude towards our motherland. Looking forward, the horizon holds the promise of the launch of Gold Mun, Delhi Public School's most awaited event. As the stars gather in the velvety sky, our students' anticipation and enthusiasm shine like constellations, heralding the arrival of October, a month of revelations and dreams fulfilled.

The razzmatazz and grandiosity of the week-long celebration of the National Sports Day provided a platform to our ingenious sports stars to showcase their talent, foster sportsmanship and enthuse a competitive spirit and accept defeat gracefully.

As I reflect on these achievements, I am in awe of the tireless efforts of our dedicated team of teachers who nurture these budding talents with care, much like gardeners tending to blossom flowers. Their guidance and mentorship are the compasses that steer our students toward their North Stars. Also, the students whose enthusiasm makes their dreams turn into realities. In closing, I am reminded of the words of Helen Keller: "Alone we can do so little; together we can do so much." As we navigate the tides of progress and growth, let us remember that the path to success is paved with dedication, dreams, and collaboration.

Dear Readers,

As we unveil this edition of our E-magazine, we are reminded of the beautiful symphony of teamwork that resonates within the corridors of Delhi Public School, Bhopal. Just as a symphony brings together diverse instruments to create harmonious melodies, your unwavering support, and our students' remarkable achievements have converged to create a masterpiece of shared success.

From spirited competitions to enriching excursions, every page of 'The Gallop' illustrates the boundless potential of our students. Their accomplishments, both on the playground and in the classroom, echo the essence of sportsmanship and camaraderie, much like a sports arena where individual efforts blend seamlessly into collective victory. They shine not only as individuals but as constellations that come together to create breathtaking cosmic stories of success.

As we navigate through these stories, we pause to express our deepest gratitude. Your involvement is the foundation upon which these tales are built. Without your trust, belief, and active participation, these endeavors would remain unfinished stories yearning for closure.

In closing, we are reminded of Ralph Waldo Emerson's words: "The only way to do great work is to love what you do." This issue is a piece of evidence to the love and dedication we all share for the holistic growth of our students. Together, we create a legacy of shared accomplishments, nurturing not just students but responsible citizens of tomorrow.

Thank you for being our partners in this journey of nurturing minds and nurturing dreams.

Happy Reading!

YEAR 2020

The most tragic, surprising, and scary year of our life.
Suddenly an unknown virus called CORONA came, and life went wrong.

No schools, no meetings, no offices, no parties, nothing.

Just stay at home and maintain social distancing.

When we were at home, our superheroes were at work 24/7.

They left their families behind and thought about others' life.

I'm talking about our doctors, nurses, medical staff, scientist, and police departments.

We fought against this for two years, and finally, our great scientists invented the vaccine.

Relief.

Again, life is starting, coming on the normal track, but when we looked behind, we missed so many dear and loved ones because of many reasons, including lack of food, medicine, and emergency services.

I felt very sorry for this, but also felt happy, that at last we are again living our life together.

I thank God for this new, precious second life.

SAVE THE EARTH

The plants, forest trees,

All need us

Not as invaders,

But as Clerks

The time hereafter is in our hands,

The young innovations of God are at chance,

The lovely birds call out for help,

making us pass their glance,

Use your knowledge and save the creatures

Struggling because of nothing,

But out creations

Start with your environment,

and change the world

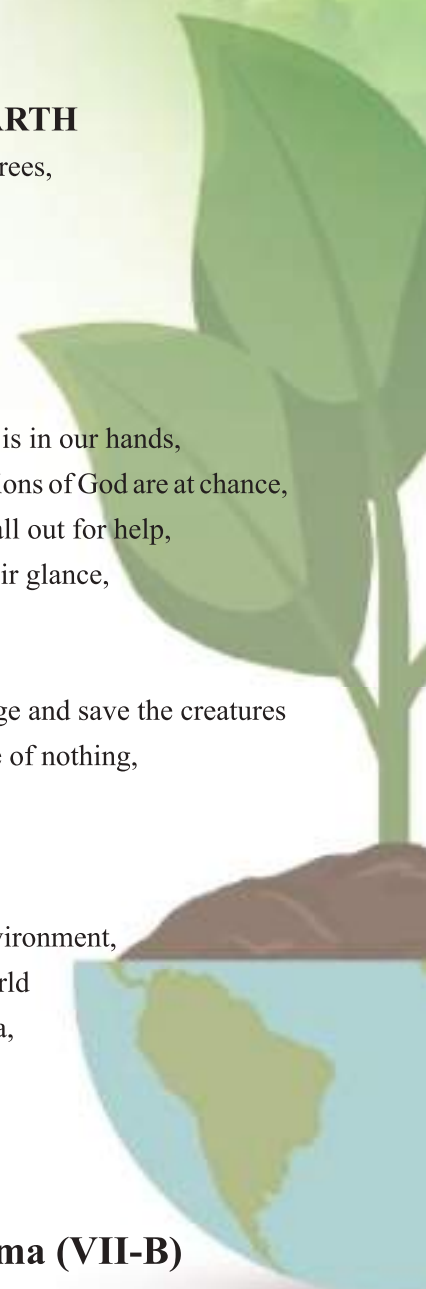

The flora and fauna,

Who just gave us,

are at risk

TECHNOLOGY – BOON OR BANE?

Christian Lous Lange once truly said, "Technology is a useful servant but a dangerous master". Technology is the application of scientific principles to the creation of a machine or technology that meets human needs. It has evolved into a crucial component of our existence. Ranging from simple watches to complex machines, it has numerous pluses and minuses. Creating efficient diagnostic instruments like MRIs, CT scans, and robotic surgery procedures supported by artificial intelligence, aids in the advancement of medical research and enables safer and more precise operations. Technology has also altered global communication trends. Instantaneous cross-border connectivity made possible by the internet and social media platforms has allowed for unprecedented levels of information exchange and cooperation. Enabling online learning programs like Massive Open Online Courses (MOOCs) has made education accessible to students from all backgrounds. In addition, transportation technology improvements like electric cars provide promise for lowering carbon emissions and halting climate change. The darker effects of our reliance on technology exist alongside these amazing accomplishments, too. Environmental degradation is one significant effect of technological development. Industrial processes that burn fossil fuels to release dangerous greenhouse gases into the atmosphere are to blame for global warming. The extraction of raw materials required to produce electrical appliances also contributes to deforestation and habitat damage. Furthermore, the speedy growth of technology has led to societal issues. Job displacement brought on by automation and artificial intelligence has led to economic inequality and unemployment in several fields. As physical and mental activity levels decline due to excessive screen time and technology use, several issues, such as Thrombosis and Musculoskeletal disorders, Obesity, Sleep deprivation and Drowsy driving, Neurological brain development concerns, Brain paralysis, Cybercrimes, addiction, mode of distraction for students and adults from study and work, reduction of creativity, and isolation of people from their families are just a few of the health issues and mental issues that have been linked to technology. Achieving sustainable development requires a balance between technology's positive benefits and its negative impacts. By responsibly disposing of electronic waste and promoting renewable energy sources like solar, hydro, and wind, we can reduce our reliance on fossil fuels and create a more equitable future. The Sustainable development goals (SDGs) provide a framework for employing technology responsibly, focusing on resilient infrastructure and inclusive production. By leveraging technology's benefits while minimizing its negative impacts, we can create a better society.

भ्रष्टाचार एक रोग

भ्रष्टाचार का अर्थ है भ्रष्ट आचार अर्थात् बिगड़ा हुआ आचरण या कार्य। न्याय, सत्य तथा ईमानदारी आदि की उपेक्षा करके स्वार्थवश किए हुए सभी कार्य भ्रष्टाचार में गिने जाते, अधिक धन की प्राप्ति के उद्देश्य से लोग भ्रष्टाचार का सहारा लेते हैं। आज देश में चारों ओर भ्रष्टाचार का बोलबाला है। आज कोई भी विभाग चाहे वह सरकारी हो, अर्द्ध सरकारी हो या जनता द्वारा चुने गए प्रतिनिधियों के संस्थान हों, सभी जगह भ्रष्टाचार लम्बे पाँव फैलाए जा रहा। बिना रिश्वत आपके घर के नल में पाली की बूँद नहीं टपक सकती, घर में रोशनी नहीं आ सकती। यहाँ तक कि सड़कें बनती नहीं, कुएँ खुदते नहीं, हैण्डपम्प लगते नहीं, कोई उपकरण या मशीनरी तक खरीदी नहीं जाती, पर लाखों-करोड़ों के बिल पास होकर भुगतान हो जाता है। भ्रष्टाचार को मिटाने के लिए हमें कृतसंकल्प होना चाहिए। इसके लिए हमें सदाचार को अपनाना होगा। यही एक रामबाण औषधि है। हमें इसके उन्मूलन के बहुमुखी प्रयासों का श्रीगणेश करना होगा। अपने उच्च आदर्शों से जन-जन को प्रभावित करना होगा। राजनीति के लोगों को समाज की भलाई से पहले अपने निजी मामलों को रखना बंद करना होगा। सरकार को भ्रष्टाचार से संबंधित पाठ्य पुस्तकों में एक अध्याय और उसके परिणाम की इच्छा शामिल करनी चाहिए। तभी हम अपने राष्ट्र को भ्रष्टाचार रूपी दानव के विकराल पंजों से मुक्ति दिला सकते हैं।
